(**database backups, project archiving** etc.)

HOSTING MODELLE

emproc Cloud (SaaS)

Description

- Shared Hosting (different customers share one server)
 - Access via Web RDP (MS Remote Desktop Web Access)
 - Faster and simplified support by emproc, since data is stored on emproc's servers
 - User administration at emproc
 - No additional and transparent costs for hardware and maintenance (low investment risk)
 - Accelerated implementation
 - Increased Mobility
 - Scalability
- ➔ Concentrate on core business

On Premises

Description

- Self hosted (customer hosts in his own IT infrastructure)
- Access Client/Server is completely controlled and maintained by the customer
- High level of control and protection (data and network)
- Individuality / Customization

Azure Cloud

Description

- SaaS (hosted at emproc/pks)
- Scalable cloud computing platform from Microsoft
- MS safety standards are observed
- Fast Operation and easy scaling
- Support of all MS integrations
- Deployment possible in all regions worldwide
- ISO 27001 Certification of data centre operator

CUSTOMIZED HOSTING MODELL

ISO 27001 certified emproc Cloud

Description

- Dedicated Hosting (separate server environment per customer), therefore high level of security (ISO 27001certified)
- TerraCloud/Wortmann AG in Düsseldorf
- Access via Web RDP (MS Remote Desktop Web Access)
- Fast and easy support by emproc, because the data is stored on emproc's servers
- User management by emproc
- Accelerated execution
- Increased mobility/agility
- Easy scalability

➔ Concentrate on core business
